SAFETY

Toyota Majesty adopts the innovative integrated active safety features known as Toyota Safety Sense™ to provide multi-faceted support for the driver's and passengers' safety.

PRE-COLLISION SYSTEM
Detects vehicles on the road ahead by using millimeter-wave radar and camera sensors and applies the brakes to help minimize collision damage.

LANE DEPARTURE ALERT
Detects white lane division lines on the road with a camera. In the event of a possible lane departure, LDA helps prevent unintentional lane changes by warning the driver with a buzzer and indicator plus steering wheel vibration.

AUTOMATIC HIGH BEAM
The system detects the lights of vehicles ahead, whether they are traveling in the same or opposite lane, and automatically adjusts the headlamps to low or high beam to enhance forward visibility during nighttime driving.

DYNAMIC RADAR CRUISE CONTROL
Keeps the vehicle traveling at a preset speed and automatically adjusts the speed to maintain a safe distance from the vehicle in front.

ASEAN NCAP
As a model with 5-star ASEAN NCAP rating, Toyota Majesty provides an outstanding level of safety with 10 SRS airbags which includes one for the front center seat, Vehicle Stability Control, Hill-start Assist Control and many more.
